TorbayPharmaceuticals

Torbay Pharmaceuticals is a UK Manufacturer of terminally sterile injectable pharmaceuticals. Based in their purpose built class-leading facility, Torbay Pharmaceutical supplies both licenced and unlicensed products to customers worldwide. Products such as Metaraminol, Isosorbide Dinitrate, Magnesium Sulphate, Morphine Sulphate and Sodium Chloride are all licenced in the UK and ready to register and supply to many export markets. Torbay Pharmaceuticals also produces an extensive range of nutrition & blood products for compounding in TPN (Total Parental Nutrition) formulations.

Torbay Pharmaceuticals is also able to support customers with large contract manufacturing opportunities.

You can meet Torbay Pharmaceuticals at CPhI on Stand 9J40 in Hall 9. They are keen to meet GDP (Good Distribution Practice) compliant distributors/wholesalers in various export markets and companies seeking contract manufacturing facilities.
